- ☀️ plenty of fun!

ON THE PAGES BELOW, WE PRESENT SAMPLE THEMES AND EVENT PLANS.

SAFARI

During our expedition into the depths of the African safari, we'll have fun discovering the world of wild animals. As part of this adventure, we will discover the secrets of programming equally exotic robots, practise the names of animals in English, and create miniature jungles!

EXAMPLE OF THE EVENT PLAN

- fun with giant soap bubbles to the rhythm of African music
- AI Robobystrzaki classes
— programming Wonder Dash robots to respond to specific commands, listening to and recognizing the sounds of wild animals, and reinforcing animal names in English
- creating a balloon zoo
- making our own mini jungles in jars

DURATION: 2 HOURS

PIRATE ADVENTURES

As pirates, we'll set off on a journey across the ocean! During our adventure, we'll programme the robot Dash to find the hidden treasure, take part in pirate-themed games, and finally make our own treasure maps.

EXAMPLE OF THE EVENT PLAN

- pirate face painting, playing with a parachute and fun in the ball pits set to adventure music
- AI Robobystrzaki classes — programming Wonder Dash robots to reach the pirate treasure while avoiding obstacles
- Muzykomotoryka classes — exercises for strong pirates and balance training during a storm, pirate ship races
- treasure chest hunt
- creating pirate treasure maps

DURATION: 3 HOURS

SMALL ASTRONAUTS

We will embark on a space adventure full of creative activities and discoveries! We will programme our own constructions, learn about the use of artificial intelligence in the space industry, create mini-comics about astronauts' adventures, and build flying rockets.

EXAMPLE OF THE EVENT PLAN

- creating a colorful meteor shower with a parachute and playing with space-themed balloons to galactic music
- Robotics classes with LEGO Education — building and programming an interactive space shuttle and UFO
- playing in mini-galaxies (ball pits) and with Saturn rings (hula hoops)
- AI Robobystrzaki classes — learning about the applications of artificial intelligence in the space industry and creating mini comic strips about astronauts' adventures
- creating paper rockets with a straw mechanism (allowing the rockets to fly)

DURATION: 4 HOURS

SUPER AGENTS

For a few hours, we'll become super agents! We'll programme a spy robot, take part in exciting missions, and at the end, we'll create secret messages using invisible markers.

EXAMPLE OF THE EVENT PLAN

- adopting secret agent identities through face painting and solving a mystery investigation to mysterious music
- Robotics classes with LEGO Education — building and programming a metal detector
- Muzykomotoryka classes — missions to transport secret documents by walking along a path of bean bags and jumping over laser fields
- arranging memory cards with colorful balls
- creating secret, encrypted messages using invisible markers

DURATION: 3 HOURS

FANTASY WORLD

We will set off on an extraordinary adventure into a world of magic and fantastical creatures! During this journey, we will create robots inspired by fantastical beings, bring drawings to life using augmented reality, take part in magical movement games, and make dragon eggs.

EXAMPLE OF THE EVENT PLAN

- choosing and applying glitter tattoos with fantasy themes on each other, accompanied by magical music
- Muzykomotoryka classes — movement games such as passing through a dragon cave tunnel and sack races through an enchanted forest
- Robotics classes with LEGO Education — building and programming fairy-tale creatures such as unicorns and fairies
- AI Robobystrzaki classes — bringing fantasy-themed coloring pages to life using augmented reality (AR)
- fairy-tale memory card game
- making dragon eggs

DURATION: 4 HOURS

YOUR IDEA

Do you have another unique idea? Would you like to combine several themes? Or perhaps you need something truly special for your event? We encourage you to share your vision with us so we can bring it to life! With our wide range of courses, ideas and creativity, we can ensure that we meet your expectations.
